CMA Testing - Provides You One-stop Electrical and Electronic Testing Services

Safety is an essential element to every internationally successful electrical and electronic product. Equipped with state-of-the-art equipment, CMA Testing provides a total solution that helps your product satisfy the worldwide testing regulations and standards. Most importantly, our value-added product design modification services help you solve the problems of incorporating product design and safety compliance requirements. Together with our global network and worldwide accreditations, we provide a single source that can help you gain access to different markets. Whatever your product needs are, our specialists can offer you quick, accurate and reliable support which enables your product to reach all major markets.

Diverse Product Range

CMA Testing provides a comprehensive range of testing through our accredited electrical and electronic laboratory including:

- Household Appliances
- Electrical Accessories
- AV Products
- Luminaires
- Electrical Toys
- Information Technology Equipment (ITE) Products

CMA Testing Facilities

Our Advanced facilities for electronic and electrical testing services include:

- 3m Anechoic chamber
- Three shielded rooms for immunity testing and modification
- Triple loops antenna and testing site (Testing frequency range from 9kHz up to 40GHz)
- Humidity chamber
- Endurance test chambers
- Draught proof enclosure
- Laser power measurement
- Waterproof test chamber
- Switch, plug, socket and extension socket endurance testing site
- Photobiological safety test system for EN62471 and 7m testing site
